

# Agility Master Class

**In the Agility Master class handlers will learn the latest moves to tighten up their dog's path and shave time off their dog's yards per second.**

**Class Requirements: Teams must have earned an AKC Excellent Standard (AX) or a USDAA Standard Agility Master (SAM) title.**

**Dogs must demonstrate a solid performance on all obstacles.**

**Handlers must be able to consistently direct their dogs through Master level courses using sound handling skills (i.e. staying off the dog's path, not "baby sitting" each obstacle, etc). Furthermore, handlers must be looking to enhance their "tool box" with new moves thereby changing/updating their handling system.**

**Because of the amount of time spent analyzing courses and discussing handling options, crates are required for this class.**
